Bug Spray and Sunscreen

Please be advised of the following Alberta Health Services recommendations:

- Parents should not apply bug spray prior to children leaving for school as prolonged exposure to bug spray is not recommended for elementary-age children.
- Please consider sending long pants and long-sleeved jackets with your child as it is much better for students to cover up when they are outside, rather than using bug spray.
- The peak eating times for mosquitoes are dawn and dusk and these times are not during school hours, so by covering up, children should be fine outside.
- School staff will not apply bug spray or sunscreen on students and these items should not be shared between friends.
